PRODUCT DEVELOPMENT

Lernziele

You know both useful and useless ways to gather customers requirements and to define the voice of the customer. You are able to create a structure of customer requirements and know how to innovate the most required customer function into a real, inspiring solution.
You are able to forecast specific costs for desired technical solutions and beyond that you can apply the four field of innvoation to an innovative product module. Furthermore, you know which mechanisms increse complexity and understand what variant drivers are. In addition, you know how to reduce the complexity of your product using product architecture and how different platform philosophies can help reduce cpmplexity and costs in operations.

Lehrinhalte

• Gathering Requirements

• Requirements Management

• Design-to-cost

• Product Architecture

• Complexity Management Part 1: Variant Drivers

• Complexity Management Part 2: Complexity Reduction

Dauer	2 hours 45 Minutes
